

Innovative Selection & Support !

We will make your job easier!

Our industry has a dizzying array of choices:

Many products seem to do the same things

Manufacturers seem to offer a complete solution

Buzzwords seem to imply compatibility with your existing systems

Equipment configurations seem to be getting easier

We believe our pledge is significant because these statements are often very far from reality. Our company specializes in making automation & control products work in your applications the way you intend.

We spend our time staying current with: So you can stay current with:

- Product functionality and features

- The best ways to make your products

- Manufacturer's product lines

- Ways to improve your products

- Automation industry trends

- Your industry trends

We offer Remarkable Service ...

You can contact us today if you need a budget price, formal quotation, proposal, cross reference or someone to track down a source for a "hard to get" part.

We thrive on finding innovative ways to help your manufacturing production processes. Kitting, alternative sourcing, short-cycle stock deliveries and sub-assembly construction are the types of services we offer to lower the production costs of our OEM customers.

You can expect us to communicate the status of your order from the time it is placed to the time your on-time delivery date is met.

We offer Remarkable Support ...

You can rely on us to offer product and application training programs, product documentation, before and after sale technical support, easy retrofit ideas and spares recommendations.

We are available to assist you during each phase of a successful project or production model lifecycle. From the concept to the plan, design, start-up and production we will make your job easier!
